CONTENTS OF VOLUME 7

NUMBER 1, JANUARY 1975

JAMES R. LINDSLEY. Producing Simple Utterances: How Far Ahead Do We Plan?	iii
LYNN A. COOPER. Mental Rotation of Random Two-Dimensional Shapes	20
DONALD A. NORMAN AND DANIEL G. BOBROW. On Data-limited and Resource-limited Processes	44
KEITH RAYNER. The Perceptual Span and Peripheral Cues in Reading	65
ROGER N. SHEPARD, DAN W. KILPATRICK, AND JAMES P. CUNNINGHAM. The Internal Representation of Numbers.	82

NUMBER 2, APRIL 1975

CARL H. FREDERIKSEN. Effects of Context-Induced Processing Operations on Semantic Information Acquired from Discourse	139
RICHARD C. ANDERSON AND ANDREW ORTONY. On Putting Apples into Bottles—A Problem of Polysemy	167
M. J. PETERSON. The Retention of Imagined and Seen Spatial Matrices	181
EARL HUNT, CLIFFORD LUNNEBORG, AND JOE LEWIS. What Does it Mean to be High Verbal?	194
PAUL A. KOLERS AND DAVID N. PERKINS. Spatial and Ordinal Components of Form Perception and Literacy	228
HERBERT A. SIMON. The Functional Equivalence of Problem Solving Skills	268

NUMBER 3, JULY 1975

PAUL A. KOLERS. Specificity of Operations in Sentence Recognition	289
LANCE J. RIPS. Quantification and Semantic Memory	307
STEPHEN MICHAEL KOSSLYN. Information Representation in Visual Images	341
CARL H. FREDERIKSEN. Representing Logical and Semantic Structure of Knowledge Acquired from Discourse	371
ERRATUM	459

NUMBER 4, OCTOBER 1975

ACKNOWLEDGMENT.	i
KATHERINE NELSON. The Nominal Shift in Semantic-Syntactic Development	461
ULRIC NEISSER AND ROBERT BECKLEN. Selective Looking: Attending to Visually Specified Events	480
THOMAS K. LANDAUER. Memory Without Organization: Properties of a Model with Random Storage and Undirected Retrieval	495
ELEANOR ROSCH. Cognitive Reference Points	532

GLORIA STRAUSS MARMOR. Development of Kinetic Images: When Does the Child First Represent Movement in Mental Images?	548
ELIZABETH F. LOFTUS. Leading Questions and the Eyewitness Report . . .	560
ELEANOR ROSCH AND CAROLYN B. MERVIS. Family Resemblances: Studies in the Internal Structure of Categories	573
AUTHOR INDEX	606

INFORMATION FOR AUTHORS

Cognitive Psychology publishes original empirical, theoretical, and tutorial papers, methodological articles, and critical reviews dealing with memory, language processing, perception, problem solving, and thinking. This journal emphasizes work on the organization of human information processing. Papers dealing with relevant problems in such related areas as linguistics, artificial intelligence, and neurophysiology also are welcomed provided that they are of direct interest to cognitive psychologists and are written so as to be accessible to them and to make their relevance clear. There are no maximum or minimum length restrictions for journal articles.

All manuscripts should be submitted to the Editor: **Dr. Earl Hunt, Department of Psychology, University of Washington, Seattle, Washington 98195.**

A manuscript submitted for publication is judged by three main criteria: (a) appropriateness of the subject matter for this journal; (b) significance of its contribution to knowledge; and (c) clarity and conciseness of writing. No changes in a manuscript may be made once it has been accepted and is in press.

Format and style of manuscript should conform to the conventions specified in the "Publication Manual" of the American Psychological Association (1200 Seventeenth Street, N.W., Washington, D.C. 20036; 1974 Revision, \$3.00), with the exceptions listed below. Please note that it is the responsibility of the author that manuscripts for *Cognitive Psychology* conform to the requirements of this journal.

Form. Type at least double-spaced throughout, including tables, footnotes, references, reference notes (if needed), and figure captions, with 1 inch margins on all sides. Submit three complete copies to expedite processing. One copy remains the property of the journal. Each copy *must* include all figures and tables.

Number the pages consecutively. *Page 1* should contain the article title, author(s) name(s), and affiliation; at the bottom of the page type a short title, not exceeding 35 characters and spaces, and the name and complete mailing address (including zip code) of the person to whom proofs should be sent. The address for correspondence should be given as a footnote to the appropriate author's name. *Page 2* should contain a short abstract, approximately 100 to 150 words in length.

Headings. The organization of the paper must be clearly indicated by appropriate headings and subheadings.

Abbreviations. Do not use final periods with units of measure that are abbreviated (cm, sec, kg, etc.) in text or in tables, except for "in." (inch).

Symbols. Underline letters that represent mathematical symbols; these will be set in *italic* type.

Equations. Some material may be displayed within the text. This is usually done for equations and linguistic examples. Number displays consecutively, with the number placed in parentheses to the extreme right of the display. In text, refer to such displays as Equation 1, Sentence 1, or Phrase 1. Punctuate equations to conform to their place in the syntax of the sentence. Displays of linguistic material should have a punctuation appropriate to the material.

Footnotes. Use only when absolutely necessary, in which case type the footnotes consecutively, double-spaced, on a separate sheet of paper in the order of their appearance in the text. Use Arabic numbers 1, 2, etc. In the text, refer to footnotes by superscript, 1, 2, etc.

Tables. Number tables consecutively with Arabic numerals in order of their appearance in the text. Type each table, double-spaced throughout, on a separate sheet; avoid vertical rules. Supply a short descriptive title below the table number. Type table footnotes, lettered *a*, *b*, etc., at the end of the table. For further information, see the "Publication Manual," pages 43-50.

Illustrations. All illustrations are considered as figures, and must be supplied in finished form, ready for reproduction. Pages 50–55 of the “Publication Manual” describe concisely the proper preparation of line drawings and photographs. Plan figures to fit the proportion of the printed page (allowing for the legend under the figure), and take care that lettering on the original is large enough to be legible after a reduction of 50–60%.

Number the figures with Arabic numerals in order of mention in the text. Supply descriptive legends (captions) for all figures. Type these (double-spaced throughout) consecutively on a separate sheet of paper.

References. For information on references, see the “Publication Manual,” pages 58–63. References in this section should be restricted to publically available published material.

Reference notes. Reference notes are references to privately circulated documents, unpublished dissertations or other work, technical reports, private communications, and work in progress. Citations to talks presented at professional meetings should be included here. It is desirable that such references be kept to a minimum in order to ensure public evaluation of articles, but we realize that at times such references are appropriate and even unavoidable. Follow the directions provided in the “Publication Manual,” pages 64–67. Reference notes should be typed on separate pages, distinct from the References section.

Author's alterations in excess of 10% of the cost of composition will be charged to the author.

Reprints. Fifty reprints of each article will be supplied free of charge. Additional reprints can be ordered on the form accompanying galley proof.
